GEAR PRIME

## DESCRIPTION

GEAR PRIME are premium quality monograde gear lubricants intended for use in gearboxes and drive axles which do not require extreme pressure gear oils. They are formulated with high viscosity index base oils with high resistance to oxidation and foaming.

## APPLICATIONS

GEAR PRIME Series consists of oils that are primarily recommended for use in commercial vehicle transmissions and drive axles with no extreme pressure requirements. They are suitable for manual gearboxes and differentials of older vehicles that operate under light and less demanding conditions.
CHARACTERISTICS-BENEFITS

| CHARACTERISTICS | BENEFITS |
| :---: | :---: |
| Superior protection against rust and oxidation. | Prolonged components life. |
| Superior thermal stability. | Oil thickening prevention in long term use and high temperature |
| service. |  |

PHYSICAL-CHEMICAL CHARACTERISTICS

| GEAR PRIME | METHOD | SAE 80W | SAE 90 | SAE 140 |
| :--- | :---: | :---: | :---: | :---: |
| Density at $15^{\circ} \mathrm{C}, \mathrm{g} / \mathrm{cm}^{3}$ | ASTM D1298 | 0.885 | 0,895 | 0,897 |
| Viscosity, Kinematic $(\mathrm{cSt}) 100^{\circ} \mathrm{C}$ | ASTM D445 | 10,0 | 15,0 | 27,0 |
| Viscosity, Kinematic $(\mathrm{cSt}) 40^{\circ} \mathrm{C}$ | ASTM D445 | 88,4 | 147,0 | 365,0 |
| Viscosity index | ASTM D2270 | 98 | 102 | 99 |
| Flash point, $\mathrm{COC},{ }^{\circ} \mathrm{C}$ | ASTM D92 | 205 | 228 | 260 |
| Pour point, ${ }^{\circ} \mathrm{C}, \max$ | ASTM D97 | -27 | -21 | -18 |

The abovementioned characteristics represent mean values.
