

SPECIAL BATTERY FLUID

DESCRIPTION

BATTERY FLUID is specially treated in ion exchange columns to remove the salts and the chlorine present.

APPLICATIONS

BATTERY FLUID is ideal for topping up car batteries.

CHARACTERISTICS-BENEFITS

CHARACTERISTICS	BENEFITS
Free of salts and chlorine.	Prevents the salts deposits. Expands the life of the battery.
Natural pH.	Prevents metal corrosion.

PHYSICAL-CHEMICAL CHARACTERISTICS

BATTERY FLUID	METHOD	
Density at 15°C, g/cm ³	ASTM D1298	1,0
Conductivity TDS, µs/cm	ASTM D1125	13
Chlorine content, ppm	ASTM D512	5
Free chlorine content, ppm	-	0
pH	ASTM D1293	6,0
Hardness, in German degrees	ASTM 1226-67	0,1

The above mentioned characteristics represent mean values.
