

TECHNICAL PRODUCT SHEET

CLEAN GLASS SUMMER

DESCRIPTION

CLEAN GLASS SUMMER is a high-efficiency screen wash formulated to deliver superior cleaning performance under warm-weather driving conditions. Its advanced surfactant system effectively removes stubborn insect residues, road film, and organic contaminants that conventional cleaners often fail to eliminate. The product ensures a clear, streak-free finish on the windscreen, supporting optimal visibility and safe driving. CLEAN GLASS SUMMER is fully compatible with standard automotive washer systems and is suitable for regular use throughout the summer season.

APPLICATIONS

CLEAN GLASS SUMMER is a concentrated screen wash designed for dilution prior to use in automotive windscreen washer systems. The product is added to the washer fluid reservoir at a recommended mixing ratio of 1:10 with water, ensuring optimal cleaning performance and economical consumption. Once diluted, the formulation provides effective removal of insect residues, road film, and organic contaminants while maintaining stable spray performance and a streak-free finish. Its composition is fully compatible with standard washer system materials, supporting reliable operation throughout the summer season.

PROPERTIES

CLEAN GLASS SUMMER provides strong cleaning action, effectively removing dirt, grease, insect residues, and other organic contaminants from the windscreen. Its formulation helps prevent the formation of salt deposits, ensuring clear visibility and consistent washer system performance during summer driving conditions. The product is engineered to be fully compatible with vehicle washer system materials and does not cause deterioration or damage to rubber components, supporting long-term reliability of the system.

PHYSICAL-CHEMICAL CHARACTERISTICS

CLEAN GLASS SUMMER	METHOD	
pH		7.0
Color		Magenta
Freezing point, °C	ASTM D1177	-21

The abovementioned characteristics represent mean values.

TECHNICAL PRODUCT SHEET

STORAGE

All packages must be stored in covered, well-ventilated areas. If outdoor storage cannot be avoided, barrels must be placed horizontally to prevent water ingress and to protect labels and markings from damage. Products must not be stored at temperatures above 60 °C and must not be exposed to direct sunlight, freezing conditions, or extreme temperature fluctuations.

HEALTH & SAFETY

This product is not considered to pose significant risks to health or safety when used as intended and in accordance with recommended personal hygiene practices. It must not be applied for purposes other than those for which it has been formulated. For detailed guidance on safe handling and use, refer to the Safety Data Sheet (SDS).

USED OILS

Used lubricants must be collected at designated collection points to prevent environmental contamination. They must not be mixed with solvents, brake fluids, or antifreeze.
