# AUTOMOTIVE, AGRICULTURAL & GARDENING

Series: **EVO** **PRO** **ECO** **MAX**

*Performance for Every Journey & Task* — Cyclon delivers precision-engineered lubrication solutions for Passenger Cars, Heavy-Duty Trucks, Motorcycles, Transmissions, Agricultural Machinery and Gardening equipment ensuring optimal protection and efficiency across every application.

With OEM-approved EVO oils, professional-grade PRO solutions, ECO sustainable lubricants and MAX endurance oils for high-mileage engines, Cyclon ensures that every driver, fleet operator, and professional finds the perfect match for their needs.

**EVO** The EVO line represents the pinnacle of Cyclon's automotive lubricant technology. Formulated to meet the latest international specifications and OEM approvals, EVO series deliver uncompromising performance, engine protection, and fuel efficiency. Ideal for modern vehicles with advanced powertrains, EVO is the trusted choice for drivers who demand excellence and reliability at every turn.

**PRO** Cyclon's PRO line is designed for professionals who value performance and practicality. Leveraging Cyclon's deep expertise in lubrication, PRO series offer robust protection and consistent quality — without the cost of formal approvals. It's a smart, dependable solution for workshops, fleets, and technicians who rely on Cyclon's legacy of engineering excellence.

**ECO** Cyclon's ECO line reflects a forward-thinking approach to lubrication, combining re-refined base oils and biobased components to reduce environmental impact. Designed for eco-conscious drivers and fleets, ECO series deliver reliable performance while supporting a lower carbon footprint. It's where sustainability meets Cyclon's uncompromising standards of quality.

**MAX** Built for vehicles that have seen the road and earned their mileage, the MAX line provides enhanced protection for older engines and high-kilometer vehicles. With reinforced additive systems and optimized viscosity profiles, MAX series help reduce wear, control deposits, and extend engine life — keeping trusted vehicles running smoothly for years to come.

# CONSTRUCTION

Series: **ERGON**

*Reliability That Never Stops* — Advanced heavy-duty lubricants engineered to withstand these challenges providing superior wear protection, thermal stability, and extended drain intervals — ensuring maximum uptime and reduced maintenance costs.

# POWER GENERATION

Series: **PWR**

*Power Under Pressure* — High performance oils for engines used in power generation systems using diesel, natural gas, landfill or biogas to ensure optimal thermal stability, oxidation resistance, and long-term reliability so as for professionals to enjoy uninterrupted performance and operational efficiency.

# LEISURE

Series: **LZR**

*Trust while in the Water* — Specially designed lubricants for both 2-stroke and 4-stroke engines, resisting corrosion, reducing smoke emissions, and ensuring clean combustion for safer, cleaner, and more enjoyable sails.

# INDUSTRIAL

Series: **IND**

*Driving Efficiency & Productivity* — Cyclon's industrial range is built for productivity and resilience. From hydraulic fluids and gear oils to compressor and heat transfer oils, our solutions are tailored to help industries reduce downtime and maximize efficiency.

**cyclon**<sup>®</sup>

ENGINEERED TO PERFORM

## MARINE

Series: **MAR**

*Power Across the Horizon* — Marine oils engineered for marine diesel engines, stern tubes, and auxiliary systems offering superior protection against corrosion, sludge formation, and thermal breakdown ensuring smooth sailing and engine longevity.

## GREASES

*Protection Where It Matters Most* — Extensive grease portfolio covering a wide spectrum of applications — from automotive and industrial machinery to marine and agricultural equipment formulated to provide excellent adhesion, water resistance, and load-carrying capacity keeping components moving, even under the toughest conditions.

## SPECIAL FLUIDS

*Clean Power for Modern Engines & Car Care* — Operating fluids designed to reduce harmful nitrogen oxide (NOx) emissions (AdBlue), to deliver superior heat transfer and corrosion protection for all types of engines and (Coolants) or support other vehicle operating systems (brakes, windshield) complying with the strictest environmental standards.

# NEW PRODUCT SERIES — MATCHING LIST

Introducing a totally reengineered, dynamic, differentiated product image, focusing on application and specification.
